Summary

I am a college student, majoring in computer science, and have been working part-time as a Tae Kwon Do instructor, now a master, for 5 years. I have strived to work diligently, meeting and exceeding the expectations placed upon me. I am determined to demonstrate my ability to perform any task asked of me, whether technical or physical.

EXPERIENCE

H S Lee's Tae Kwon Do School, 565 Inman Ave Woodbridge Township, New Jersey — *Instructor/Master*

2016 - PRESENT

- Acquired experience in working with and teaching students across various age groups, spanning from young children to adults.
- Conducted classes that encompassed basic warm-ups and technique practice.
- Instructed beginner students in fundamental techniques during their initial weeks.
- Provided guidance and corrections to students while they learned or practiced new techniques and forms.
- Enhanced students' well-being by diligently cleaning the entire dojang at the conclusion of each day's classes.

EDUCATION

Kean University, Union NJ — *computer science*

2018 - PRESENT

At this college, my major included a basic college education, as well as an introduction to programming fundamentals. My education has equipped me with the skills to compose and convey various forms of technical writing, along with proficiency in college-level mathematics that could be applied to any numerical analysis requirements. Additionally, I have acquired knowledge in interacting with and creating databases. Moreover, I have learned to develop a simple website capable of showcasing tables and diverse graphs by utilizing uploaded CSV files or an existing database.

Skills

Fourth-degree black belt in Tae Kwon Do

Experience working with kids ages 4-13

College-level math skills

Proficiency in college-level technical writing

Basic programming knowledge in Java, Python, HTML, and PHP

Strong work ethic
